## **Lake Conroe's levels require a release**

Lake Conroe reached 201.00 feet above mean sea level on May 13, 2014. This is the first time that Lake Conroe has been at full pool elevation since April 25, 2010. Receiving 4 inches of rain in a 24 hour period brought the lake above full pool and required us to start releasing on May 14, 2014.

SJRA holds a permit from the state for water levels up to 201' above mean sea level, anything above that we are required to release. We will increase and decrease the flows based upon levels.

For more detailed information and updates on lake levels and release information please go to [www.sjra.net](http://www.sjra.net).
