Water Line Construction Update

Traffic Control- for School areas

The updates below are all based upon good weather conditions with no delays

The segment in front of The Woodlands High School will be complete and normal flow of traffic will occur no later than August 24, 2014.

The contractor is working to complete south bound lanes on Grogans Mill Rd. from South Millbend to Sawmill no later than September 5, pending final concrete preparation and traffic restoration. The major intersections will remain open to thru traffic. We will be coming back at a later date to complete the intersection construction at Millpark Dr. and Sawmill Rd. in early fall.

To assist traffic flow during school start up the week of August 25, we are working with CISD to have additional police officers at the major intersections.

From Sawmill Rd. to Blue Fox Rd. we estimate completion to be September of 2014. The segment from Blue Fox Rd. to Sawdust we estimate completion to be early fall of 2014.

On behalf of SJRA, we appreciate your patience and understanding as we install the water transmission lines for the Ground Water Reduction Program that will be delivering water to The Woodlands as well as areas in Conroe. For more detailed information on traffic as well as the program, please visit www.sjra.net/grp.
