Meet Some of our Employees that Provide Uninterrupted Essential Services to our Community

This is Tia. Tia is an Utility Operator in Training. Thank you Tia for your nonstop hard work to ensure that our treatment plants are operating proficiently, while adhering to all state and local regulations.

Meet Jeff. Jeff is a Utility Lead Maintenance Tech at the three wastewater treatment facilities that serve several of the Woodlands MUDs. Thank you Jeff for your skilled work on the facility's electrical upgrade and your years of dedicated service.

This is Shawn. Shawn is a SCADA I&C Technician. Thank you Shawn for your precise and expert work on the calibration procedures for the chlorine analyzer.

Thank you Tia, Jeff, and Shawn!

Memorial Day - May 25, 2020

On Memorial Day and every day we remember all service members who gave the ultimate sacrifice for the USA.

Lake Conroe Clean Rivers Sampling Program

Lake Conroe was constructed in the late 1960s to the early 1970s in a joint venture between the San Jacinto River Authority (SJRA) and City of Houston with the sole purpose of providing a drinking water source to serve future demand in the greater Houston Metropolitan area.

As a partner in the project, SJRA takes great pride in operating and maintaining the Lake Conroe Dam and Reservoir. Included in the responsibilities is the charge of assessing the quality of the water in the reservoir. In cooperation with the Houston Galveston Area Council, SJRA administers the **Clean Rivers Program** (CRP) on Lake Conroe. The CRP is a water quality initiative overseen by Texas Commission on Environmental Quality for the purpose of monitoring the overall health of Texas Waterways.

Be on the look out for our **Lake Conroe Clean Rivers Sampling Program** article in the next installment of [Dock Line Magazine](#).

Did you know?

SJRA, in partnership with the Texas Water Development Board, is developing a Reservoir Forecasting Tool to assist in predicting peak release rates and water levels at Lake Conroe during rainfall events. Predictions are based on weather forecasts, observed rainfall, lake levels, and other data, and will allow SJRA to enhance communication with Offices of Emergency Management and the general public during rainfall events affecting the region.

Reminder #HurricaneSeason2020 starts June 1st.

- Make a kit.
- Have a plan for people and pets.
- Sign up for alerts from your local OEM.

The San Jacinto River Authority's mission is to develop, conserve, and protect the water resources of the San Jacinto River basin. Covering all or part of seven counties, the organization's jurisdiction includes the entire San Jacinto River watershed, excluding Harris County. The SJRA is one of two dozen river authorities in the State of Texas, and like other river authorities, its primary purpose is to implement long-term, regional projects related to water supply and wastewater treatment. SJRA receives no money from the state, nor does it collect any type of taxes.

If you would like to know more about SJRA, what we do, and how we work for the community, check out our website www.sjra.net and follow us on social media [@SanJacintoRiverAuthority](#), [@SJRA_1937](#), [@sanjacintoriverauthoritysira](#), [@San Jacinto River Authority](#).
