Spring Creek Flood Control Dams Feasibility Study

The San Jacinto River Authority (SJRA) will hold a public meeting on Thursday, April 7, 2022, from 6 p.m. to 8 p.m., at the Fields Store Community Center, located at 26098 FM 362, Waller, Texas 77484, to discuss the Spring Creek Flood Control Dams Feasibility Study (the "Project").

The Project is a continuation of the Spring Creek Siting Study, a sub-task of the San Jacinto Regional Watershed Master Drainage Plan project (SJMDP) led by Harris County Flood Control District (HCFCD) and supported by multiple partner agencies including the San Jacinto River Authority (SJRA). The Spring Creek Siting Study explored multiple alternative projects and detention siting locations to provide flood mitigation benefits to the Spring Creek watershed. Two of the more cost-effective alternatives identified by the SJMDP are dams on Walnut Creek and Birch Creek. The Spring Creek Flood Control Dams Feasibility Study will include a conceptual-level design for each of the two dams, as well as definition of benefits and costs for each dam and a combination of the two dams. The outcome of this study will allow project sponsors to determine the most feasible and economical alternative(s) for possible future design and construction. The Project is being funded by the Texas Water Development Board (TWDB), Harris County Flood Control District, City of Humble, and five (5) Municipal Utility Districts, with in-kind services being provided by SJRA.

The meeting will be in an open-house format, allowing members of the public to come and go at their convenience at any time between 6:00 p.m. and 8:00 p.m. A short, high-level project summary presentation will be given at 6:00 p.m., 6:30 p.m., 7:00 p.m., and 7:30 p.m. Members of the project team will be available between these presentations to collect input and answer questions from members of the public.

Questions or requests for additional information may be directed to Mr. Matt Barrett, P.E., Water Resources and Flood Management Division Manager, SJRA, 1577 Dam Site Road, Conroe, Montgomery County, Texas 77304, Tel. (936) 588-3111. Any interested persons unable to attend the meeting may provide input through the project website (www.SpringCreekStudy.com).
