

SwIM Kit Instructions

The San Jacinto River Authority (SJRA) would like to thank you and your group for your participation in the SwIM Program. The success of this educational program is a direct reflection of the ever-increasing dedication and enthusiasm our volunteers display on a continual basis. Your involvement will ensure continued water quality protection in and around the Lake Conroe watershed, and for that we are sincerely grateful. We look forward to potentially working with you and your group again on our endless quest to grow the SwIM Program and provide water education to the public.

The SwIM kit contains all necessary supplies to install forty (40) medallions. If you and your group wish to mark more than forty (40) stormwater inlets, please note that in the additional notes section of the SwIM Application.

Materials in SwIM kit:

- | | |
|---------------------|-----------------------------|
| 1. Instructions | 6. Three safety vests |
| 2. Carrying bucket | 7. One wire brush |
| 3. Non-latex gloves | 8. SwIM medallions |
| 4. Safety Glasses | 9. Caulk gun |
| 5. Two safety cones | 10. Three tubes of adhesive |

Instruction for applying SwIM medallions:

1. Think about safety first and foremost.
2. Put on safety vest, glasses and gloves before starting.
3. Place safety cones on both sides of stormwater inlet, so that cones are clearly visible to traffic.
4. Designate one person to watch for traffic at all times.
5. Use wire brush to clean a patch of concrete, the size of the medallion. The application area should be centered on the top of the stormwater inlet.
6. Use caulk gun and apply glue to the back of the medallion in a spiral pattern.
7. Place the medallion at the center of the stormwater inlet (facing towards the street). Press firmly against the medallion so that adhesive will properly adhere to the concrete. Do not place medallion on metal stormwater inlet lid.
8. Pick up all materials and place back in SwIM kit bucket.
9. Map location, using the supplied "Arc GIS collector app."
10. Return bucket with safety gear and all unused stormwater inlet marking materials to:
 - a. San Jacinto River Authority-Lake Conroe Division
 - b. 1577 Dam Site Road
 - c. Conroe TX 77304.
