

San Jacinto River Authority Latest News for June 2026

Safety on Lake Conroe

Summer is in full swing, bringing an increase in boating activity on Lake Conroe. Whether a first-time visitor, or experienced boater, it is always good to be reminded of the key boater safety tips to ensure a fun and safe experience for everyone on the water.

Be on the lookout for our *Safety on Lake Conroe* article in [Dock Line Magazine](#) and our [SJRA Blog](#).

SJRA's Weather Aware Guide

When severe weather threatens Southeast Texas, being prepared starts with having the right information before the storm arrives. That's why the San Jacinto River Authority created the Weather Aware Guide — a simple, step-by-step resource to help you stay informed, understand more about the flow of water, and make safer decisions during events.

3 Steps to Stay Weather Aware

Use these resources before and during storm season to better understand local conditions and make informed decisions.

1

Know Your Watershed

 www.knowyourwatershed.com

Visit www.knowyourwatershed.com to find which watershed you are in using the address viewer. Understanding your watershed helps you see how water moves through your river basin and can help you be better prepared before hurricane season.

2

Monitor the Weather Gauge Near You

 www.harriscountyfws.org

Visit www.harriscountyfws.org to identify and monitor the gauge nearest your location. Keeping an eye on rainfall levels in your area can help you stay weather aware during a storm.

3

Follow Official Weather Sources

 sanjacinto.onerain.com

Follow your local Office of Emergency Management, the National Weather Service, and trusted local weather stations during a storm. Visit sanjacinto.onerain.com for SJRA weather and streamflow information, plus links to additional official weather resources.

We work for your water

before the next weather event.

across Harris and Montgomery
counties.

Water Conservation Corner

Each month, we'll share practical water conservation tips, seasonal recommendations, and simple ways you can help protect one of Texas' most valuable resources. Small actions at home and in your landscape can make a big difference in preserving our water supply for generations to come.

Water-Saving Tip:

Work with the weather when watering your lawn. If your yard receives $\frac{3}{4}$ inch of rain or more, skip irrigation for the rest of the week. Letting nature do the watering helps conserve water, reduces runoff, and can save money on your water bill.

Every drop counts. Check back each month for simple, practical tips to help you use water efficiently, save money, and do your part to conserve the best water in Texas.

SJRA Rates and Fees to Wholesale Providers:

SJRA does not have taxing authority, nor does it receive funds from the Texas Legislature. SJRA is funded solely through contracts with its wholesale customers to provide water supply and wastewater treatment. View information on rates and fees to our wholesale customers (**SJRA does not provide retail service to individual homes and business**) on our website. Click [HERE](#).

SJRA's mission is to develop, conserve, and protect the water resources of the San Jacinto River basin. Covering all or part of seven counties, the organization's jurisdiction includes the entire San Jacinto River watershed, excluding Harris County. The SJRA is one of two dozen river authorities in the State of Texas, and like other river authorities, its primary purpose is to implement long-term, regional projects related to water supply and wastewater treatment.
