

San Jacinto River Authority Latest News for August 2026

"This is Texas Water" Awareness Campaign

SJRA is proud to join the Texas Water Development Board's **This Is Texas Water** awareness campaign, an effort created to inspire Texans to better understand their water, where it comes from, how much their communities will need in the future, and the water infrastructure and planning needed to help ensure our state never sees a day without it.

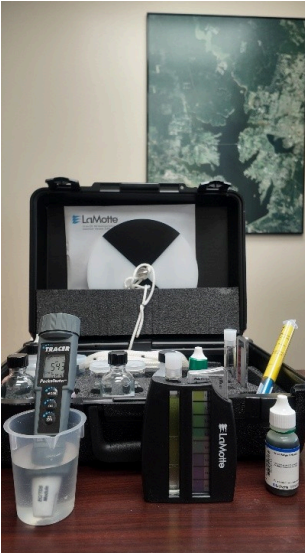

Water is essential to every Texan, and understanding where it comes from and how it is managed is an important part of protecting our state's water future.

Keep an eye out for SJRA's **This Is Texas Water** billboard coming soon to Highway 105! We're excited to help spread the message and encourage our

Protecting Water at the Source

Whether you're boating on Lake Conroe, fishing along its shoreline, or simply enjoying the natural beauty of the region, water quality plays an important role in our daily lives. Clean water supports healthy ecosystems, safe recreation, and thriving communities. Behind the scenes, the San Jacinto River Authority (SJRA) manages a network of programs designed to monitor, protect, and improve water quality throughout the San Jacinto River Basin. While each program serves a unique purpose, they are all connected by a common goal: safeguarding one of the region's most valuable natural resources. SJRA works with partners and the community in a range of programs designed encourage responsible environmental practices.

- Clean Rivers Program
- Nutrient Sampling Program
- Creek Sampling Program
- Zebra Mussel Monitoring Program
- Storm Water Inlet Marking (SwIM) Program
- Texas Stream Team Program
- Native Aquatic Plant Program

In addition to monitoring and regulatory efforts, SJRA works to increase public awareness of watershed protection through school tours, publications, community outreach events, and social media. These educational efforts help residents better understand how their everyday actions can impact local waterways and encourage responsible environmental stewardship.

While each program serves a specific purpose, they are most effective when working together. Together, they form a comprehensive approach to protecting water quality across the San Jacinto River Basin. From collecting data and restoring habitat to engaging volunteers and managing development, every

effort contributes to the same goal: ensuring healthy waterways for future generations.

Water Conservation Corner

Each month, we'll share practical water conservation tips, seasonal recommendations, and simple ways you can help protect one of Texas' most valuable resources. Small actions at home and in your landscape can make a big difference in preserving our water supply for generations to come.

Water-Saving Tip:

Looking to save water at home? Start in the laundry room by selecting an ENERGY STAR® certified washing machine. These models are designed to use water more efficiently, helping you conserve more with each wash.

Explore additional laundry room water-saving tips in the [Water Use It Wisely Laundry Room Archives](#).

Every drop counts. Check back each month for simple, practical tips to help you use water efficiently, save money, and do your part to conserve the best water in Texas.

SJRA is Recruiting!

SJRA Rates and Fees to Wholesale Providers:

SJRA does not have taxing authority, nor does it receive funds from the Texas Legislature. SJRA is funded solely through contracts with its wholesale customers to provide water supply and wastewater treatment. View information on rates and fees to our wholesale customers (**SJRA does not provide retail service to individual homes and business**) on our website. Click [HERE](#).

SJRA's mission is to develop, conserve, and protect the water resources of the San Jacinto River basin. Covering all or part of seven counties, the organization's jurisdiction includes the entire San Jacinto River watershed, excluding Harris County. The SJRA is one of two dozen river authorities in the State of Texas, and like other river authorities, its primary purpose is to implement long-term, regional projects related to water supply and wastewater treatment.
