

San Jacinto River Authority Latest News for September 2026

Latest From Navigating the Current

In Montgomery County, drinking water comes from two primary sources, groundwater and surface water. So where does our drinking water actually come from? Join us as we discuss where our water comes from, and the importance of the lakes and aquifers in Montgomery County. Watch the latest episode on our YouTube channel [@sanjacintoriver](https://www.youtube.com/@sanjacintoriver).

Lake Conroe - Lake Houston Joint Reservoir Operations Study

Public Meeting No. 2

Please join us for the upcoming Joint Operations Reservoir Study Public Meeting No. 2, at
Lone Star Convention & Expo Center (9055 Airport Road, Conroe, Texas)
on Thursday, November 5, 2026 at 6:00pm.

Before and after the presentation, members of the public will be able to view study exhibits, speak with study team members, and submit comments.

Where Does Our Drinking Water Come From?

Water is an essential part of our daily lives and routines. We can easily take it for granted. From morning showers to washing dishes and watering lawns, clean water is available at the simple turn of a faucet. Yet this convenience is a modern one. Less than 100 years ago, homes lacked indoor plumbing, and accessing water often required long walks to a nearby well or paying for someone to haul water.

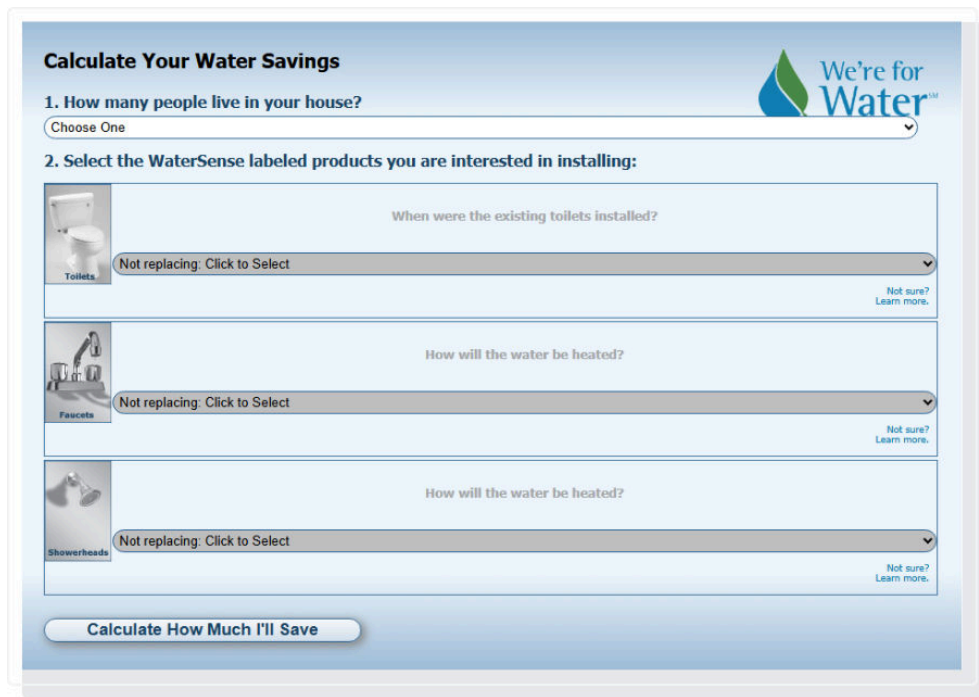

The next time you turn on the faucet, take a moment to consider how far the water has traveled for your convenience. Long before water reaches your home, it has traveled through aquifers, treatment facilities, storage tanks, and miles of pipeline, supported by infrastructure and careful stewardship designed to provide safe, reliable drinking water every day.

Be on the lookout for our *Where Does Our Drinking Water Come From* article in [Dock Line Magazine](#) and our [SJRA Blog](#).

Water Conservation Corner

Each month, we'll share practical water conservation tips, seasonal recommendations, and simple ways you can help protect one of Texas' most valuable resources. Small actions at home and in your landscape can make a big difference in preserving our water supply for generations to come.

The image shows a screenshot of the EPA's WaterSense Calculator interface. The title is "Calculate Your Water Savings". In the top right corner is the "We're for Water" logo. The first step is "1. How many people live in your house?" with a dropdown menu labeled "Choose One". The second step is "2. Select the WaterSense labeled products you are interested in installing:". There are three sections for selection:

- Toilets:** Includes a toilet icon, the question "When were the existing toilets installed?", a dropdown menu with "Not replacing: Click to Select", and a link "Not sure? Learn more."
- Faucets:** Includes a faucet icon, the question "How will the water be heated?", a dropdown menu with "Not replacing: Click to Select", and a link "Not sure? Learn more."
- Showerheads:** Includes a showerhead icon, the question "How will the water be heated?", a dropdown menu with "Not replacing: Click to Select", and a link "Not sure? Learn more."

At the bottom is a button labeled "Calculate How Much I'll Save".

Water-Saving Tip:

Looking for an easy way to save water and lower your utility bills? The EPA's WaterSense Calculator can help you discover how much water and money you could save by upgrading to WaterSense labeled products in your home. Even small changes, such as installing water-efficient fixtures, can lead to significant savings over time. [Try the WaterSense Calculator](#) today and see how simple conservation efforts can make a big difference.

Every drop counts. Check back each month for simple, practical tips to help you use water efficiently, save money, and do your part to conserve the best water in Texas.

SJRA Rates and Fees to Wholesale Providers:

SJRA does not have taxing authority, nor does it receive funds from the Texas Legislature. SJRA is funded solely through contracts with its wholesale customers to provide water supply and wastewater treatment. View information on rates and fees to our wholesale customers (**SJRA does not provide retail service to individual homes and business**) on our website. Click [HERE](#).

SJRA's mission is to develop, conserve, and protect the water resources of the San Jacinto River basin. Covering all or part of seven counties, the organization's jurisdiction includes the entire San Jacinto River watershed, excluding Harris County. The SJRA is one of two dozen river authorities in the State of Texas, and like other river authorities, its primary purpose is to implement long-term, regional projects related to water supply and wastewater treatment.

If you would like to know more about SJRA, what we do, and how we work for the community, check out our website www.sjra.net and follow us on social media [@SanJacintoRiverAuthority](#), [@SJRA_1937](#), [@sanjacintoriverauthoritiesjra](#), [@sanjacintoriver](#), [@San Jacinto River Authority](#).
